

polymer having 3.5 or more reactive functional groups per polymer chain and a B polymer having about 2 to about 3 functional groups per polymer chain that are co-reactive with said reactive functional groups of the A polymer; said B polymer is a condensation polymer selected from the group consisting of polyamide, polyester, epoxy, polyurethane, polyorganosiloxane and poly(ether), said co-reactive functional groups of said B polymer are hydroxyl, carboxyl, epoxy, oxazolinyl, ester, amino, isocyanato or mixtures thereof, said A polymer has 3.5 or more hydroxyl functional groups per polymer chain, and (ii) a colorant, wherein substantially all of the co-reactive functional groups of the B polymer have been co-reacted and a molar ratio of A polymer to B polymer is about 3:1 to about 2:1.7.

REMARKS

Claims 9, 10, 20, 21, 40 and 41 were withdrawn in the parent application as being directed to a non-elected species. Claims 42-51 were withdrawn as being drawn to a non-elected invention. This divisional application is directed to these previously withdrawn claims. Claims 9, 20 and 40 are presented herein as newly re-written Claims 52, 53 and 54, respectively. Original dependent Claims 2, 3, 10, 12, 13, 21, 33, 34 and 41 are made depend on the re-written claims following the same format as in the parent application.

With entry of the above amendments, early action on the merits is respectfully requested.

Respectfully submitted,

SIGNATURE OF PRACTITIONER

Neil E. Hamilton
